Conference „Young Generation In BioBusiness”

20 May 2010

The conference is organized by The Academic Students' Society of Biotechnology in cooperation with Bio-Tech Consulting

The schedule of the conference:

- The presentations of students' projects(contest)
- Lectures
- Workshops
- Meetings
- Debate "How to improve the transfer of ideas and concepts from academic centers to biotechnology business"

The conference is directed at young people interested in the field of biotechnology. Hard – working, ambitious and full of involvement youngsters who produce many innovative ideas. Unfortunately, this is not enough. Transferring ideas from academic centers into industry is complicated and meets numerous obstacles.

The series of lectures will show how to cope with problems in setting up new biotechnology business or spin off – spin out companies. Moreover, everyone will be welcome to participate in the workshops about body language, effective ideas, proper CV preparation and intellectual property law. We also make up a contest for the best students' project with industrial potential. For authors of the best projects we have provided attractive awards (one of them is summer apprenticeship in British biotechnology company). We would also like to conduct a debate "How to improve the transfer of ideas and concepts from academic centers to biotechnology business" in which scientists working in research centers, workers and owners of biotechnology companies will take part. After the debate, the audience will be given an opportunity to discuss with debate participants.

The conference is organized on Central European Business Forum of Biotechnology & Innovative BioEconomy. The entrance is free.

Soon we will introduce more specific information.
