Instructions for Authors

Polish Journal of Veterinary Sciences accepts manuscripts (original articles, letters to editor, review articles) from the entire field of veterinary medicine. The manuscript should be send to:

Prof. L. Mirosław Łakomy, Editor-in-Chief, Polish Journal of Veterinary Sciences, Department of Animal Anatomy, University of Warmia and Mazury in Olsztyn, PL-10-719 Olsztyn-Kortowo II, Poland, tel.: 0048-89 523-37-33, fax: 0048-89 523-49-86; e-mail: pjvs@moskit.art.olsztyn.pl

The submission of the manuscripts is regarded as the Author's statement that it has not been published (or submitted to publication) elsewhere, neither as a whole manuscript, nor as a part.

1) Prerequisites for publication

Authorship. The Editors of Polish Journal of Veterinary Sciences subscribe to recommendations formulated by the International Committee of Medical Journals (Ann Int Med (1988) 108:258-265) regarding criteria for authorship. Therefore, each person listed as an author or co-author of a submitted manuscript must meet all of three criteria listed below. Thus, an author or co-author shall have i) conceived, planned and performed the work leading to the report, or interpreted the evidence presented, or both, ii) written the manuscript or reviewed successive versions and shared in their revisions, iii) approved the final version. Meeting these criteria should provide each author with sufficient knowledge of, and participation in the work that the author can accept public responsibility for the manuscript.

Retraction. The editors of the Polish Journal of Veterinary Sciences recognize their responsibility to provide a rationale for retraction of articles that are subsequently determined to contain fraudulent data, observations or conclusions.

Use of animals. Manuscripts submitted for publications must contain a statement that the "Principles of laboratory animal care" (NIH publication No. 86-23, revised 1985), as well as the specific national laws on the protection of animals were followed. The Materials and Methods section should contain a description of analgesic and anesthetic procedures followed, as well as humane methods of maintenance and sacrifice (if applicable). The Editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The authors will be held responsible for false statements or for failure to fulfill the above-mentioned requirements.

2) General

Manuscripts (exclusively in English, to assure their widest possible readership) and their accompanying illustrations must be submitted in triplicate (original manuscript typed on one side of the paper plus two copies photocopied on both sides). Text must be double-spaced, with wide margins throughout. Three sets of illustrations should be submitted: mounted layout of the originals and two sets of good quality prints, with axes and inscriptions on the micrographs, including figure numbers. Instant lettering (about 3 mm high) is recommended for any inscriptions on the micrographs, including figure numbers. Color illustrations may be accepted, however, the authors will be expected to make a contribution towards the extra costs (the costs estimate will be sent to the authors for their approval after submission of the manuscript). For color prints, slides should also be sent. Legends must be concise and should provide a brief, self-sufficient explanation of the illustrations. Avoid remarks like "For explanation, see text".

References to abstracts published in the congress materials should be cited. In the text, they should conform the following examples: "... Kaleczyc (1997) has shown..." or "... as recently revealed (Lakomy 1989, 1990, Majewski and Kaleczyc 1995, Kaleczyc et al. 1997), it seems that...". All references should be listed at the end of the paper as follows:

References must also be typed double-spaced, and all species and subspecies names used must be underlined to indicate italics.

Illustrations. The number and size of illustrations must be consistent with the minimum requirements for clarification of the text. Numerical data given in graphs or tables should not be repeated in the text. Line drawings should be submitted as good-quality prints, with the letters 2 mm high in the printed version. Micrographs should be submitted as sharp, glossy originals, maximally trimmed at right angles to eliminate areas without significant information content and be of the desired final size (the layouts or single micrographs may either match the width of the column (8.6 cm) or the width of the entire page (17.8 cm). The maximum length of the layout is 25 cm). Instant lettering (about 3 mm high) is recommended for any inscriptions on the micrographs, including figure numbers. Color illustrations may be accepted, however, the authors will be expected to make a contribution towards the extra costs (the costs estimate will be sent to the authors for their approval after submission of the manuscript). For color prints, slides should also be sent. Legends must be concise and should provide a brief, self-sufficient explanation of the illustrations. Avoid remarks like "For explanation, see text".

In the manuscript, Legends should be typed double-spaced on a new page after the References.

Tables. They must be numbered consecutively in arabic numerals and be typed on separate sheets. The head of each table should provide a brief, self-sufficient explanation of its contents.

Review procedure. Manuscripts are normally subject to the assessment of reviewers and the editors. Manuscripts that have been extensively modified in review process will be returned to the author for retyping.

Changes in proofs. A change will be made for changes introduced after the manuscript has been set in type.

Off-prints. Twenty (20) off-prints of each paper are supplied free of charge.

Bank PEKAO S.A. I 0/Olsztyn, account No 12401590-2919678-2700-40112, with annotation "for publication in Polish Journal of Veterinary. Sciences." Considering the organization of the manuscript, the following sequence is required: Abstract (not exceeding 250 words), Keywords (up to seven), Introduction, Materials and Methods, Results, Discussion, Acknowledgements (if any). References, Tables and Illustrations, Legends. The first page of the manuscript must include the title, name(s) and initial(s) of author(s), affiliation(s), running title (no more than 60 characters incl. spaces) and a detailed address for correspondence.

References. Only references to papers published in regular journals, books and book chapters, or abstracts published in regular journals (or supplements to regular journals) are accepted. No references to abstracts published in the congress materials should be cited. In the text, they should conform the following examples: "... Kaleczyc (1997) has shown..." or "... as recently revealed (Lakomy 1989, 1990, Majewski and Kaleczyc 1995, Kaleczyc et al. 1997), it seems that...". All references should be listed at the end of the paper as follows:

References must also be typed double-spaced, and all species and subspecies names used must be underlined to indicate italics.

Illustrations. The number and size of illustrations must be consistent with the minimum requirements for clarification of the text. Numerical data given in graphs or tables should not be repeated in the text. Line drawings should be submitted as good-quality prints, with the letters 2 mm high in the printed version. Micrographs should be submitted as sharp, glossy originals, maximally trimmed at right angles to eliminate areas without significant information content and be of the desired final size (the layouts or single micrographs may either match the width of the column (8.6 cm) or the width of the entire page (17.8 cm). The maximum length of the layout is 25 cm). Instant lettering (about 3 mm high) is recommended for any inscriptions on the micrographs, including figure numbers. Color illustrations may be accepted, however, the authors will be expected to make a contribution towards the extra costs (the costs estimate will be sent to the authors for their approval after submission of the manuscript). For color prints, slides should also be sent. Legends must be concise and should provide a brief, self-sufficient explanation of the illustrations. Avoid remarks like "For explanation, see text".

In the manuscript, Legends should be typed double-spaced on a new page after the References.

Tables. They must be numbered consecutively in arabic numerals and be typed on separate sheets. The head of each table should provide a brief, self-sufficient explanation of its contents.

Review procedure. Manuscripts are normally subject to the assessment of reviewers and the editors. Manuscripts that have been extensively modified in review process will be returned to the author for retyping.

Changes in proofs. A change will be made for changes introduced after the manuscript has been set in type.

Off-prints. Twenty (20) off-prints of each paper are supplied free of charge.
